

Roto-Rooter® Brand Sugar Residue Digestant is an exclusive formula sold in two-gallon containers. The Roto-Rooter® time flow meter dispenses the product using a special metering device and an additional "misting unit" that ensures proper delivery of the treatment.

Potential users of SRD include:

- Restaurants
- Bars
- Soda Pop Distribution Centers or Plants
- Auditoriums
- Hotels
- Grocery Stores
- Convenience Stores
- Ice Cream Factories or Retail Stores
- Stadiums

SRD is:

- Non-toxic, non-corrosive to humans and pipes
- Fast-acting and provides residual preventive maintenance for problem drain lines
- Used anywhere high sugar/carbohydrate food substrates are created or processed
- Different from drain and grease trap treatment product

SRD Brochure

Roto-Rooter® Sugar Residue Digestant

Roto-Rooter® Sugar Residue Digestant degrades hard-to-remove buildup created by sugar/carbohydrate materials.

Roto-Rooter®

Sugar Residue Digestant

What is a 'Sugar Snake?'

Fast food restaurants, hotel restaurants, pubs, convenience stores and grocery stores all have a common problem. It's known as "sugar snake," the result of carbohydrates (sugar) from soft drinks and other sugar-laden products building up inside drain lines. This leads to backups, costly emergency plumbing services and odor problems. Regular use of Roto-Rooter® Brand Sugar Residue Digestant (SRD) eliminates these problems.

It's Not Just A Product ... It's a System

A Roto-Rooter® time flow meter with a special "misting" attachment virtually eliminates the buildup of sugar residue in your drain lines. It automatically dispenses the Sugar Residue Digestant into your

problem line throughout the day – no mess, no worries. Sugar Residue Digestant is non-caustic, non-corrosive and environmentally friendly.

Fast Results!

Roto-Rooter Sugar Residue Digestant acts fast – usually within 24 hours.

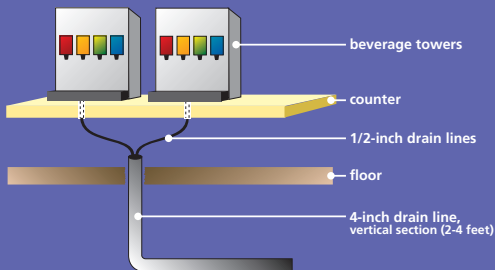

Prior to treatment, a "sugar snake" is blocking the line

After 24 hours, Roto-Rooter® Sugar Residue Digestant has completely eliminated the sugar buildup.

Problems Occur in Beverage Stations

The special misting unit ensures that Roto-Rooter® Sugar Residue Digestant completely coats the walls of the drain line to help solve the problem quickly.
